

# Roaming Calls - 2G user Calling 4G Roaming UE

- ❖ 4G User when roaming into 2G Network registers to 2G MSC. I.e Location update is performed and MSC has MSISDN vs IMSI MAP stored.
- ❖ When 2G user calls 4G roaming user, MSC receives Call and checks Called MSISDN is registered into MSC.
- ❖ If registered, Paging is initiated to BSC within 2G network to call 4G user.

# Roaming Calls - 2G Calling 4G Roaming UE Call Flow
