

Roaming Calls - 3G user Calling 4G Roaming UE

- ❖ 4G User when roaming into 3G Network registers to 3G MSC. I.e Location update is performed and MSC has MSISDN vs IMSI MAP stored.
- ❖ When 3G user calls 4G roaming user, MSC receives Call and checks Called MSISDN is registered into MSC. If registered, Paging in initiated to RNC within 3G network to call 4G user.
