Release Notes for MAPS™ SIP I - Version 26.10.26

MAPS™ Protocol-Specific Enhancements

Reason for Release / Description of Enhancement	Version
MAPS™ SIPI Enhancements: • Includes MAPS™ GUI and framework updates. • Includes support for information elements such as the Access Transport and User-to-User Information (UUI) parameters in the ISUP body of the INVITE message. • Includes options to configure Subaddress parameters in the SIP/ISUP layer in the profiles. • Includes support to insert LIID, CIN and CCLID (vendor-specific) values in the ISUP layer of the INVITE message. • Includes a simplified Python client delivered as a .whl package. **Bug Fixes:** • Includes fix to handle repeated re-INVITEs, with or without SDP, within the same dialog. • Includes fix to handle the RTP issue when 100 Trying is received after 200 OK. • Includes fix to update ptime in the CLI. • Includes fix to handle TLS calls on non-default ports. • Includes fixes to handle 4xx responses received for BYE and REFER. • Includes script fixes to handle errors generated during execution/runtime. • Includes correction of Send/Recv file paths in TrafficProfile.xml. • Includes fix to set PeerT38FaxUdpEC as the default "t38UDPRedundancy" when it is not received in the SDP offer for T.38 fax calls.	**26.10.26**
MAPS™ SIPI Enhancements: • Package built on VS2019. • Includes MAPS™ GUI and framework updates. • Includes updates to configure and insert calling and called party sub address information elements in INVITE. **Bug Fixes:** • Includes fixes for handling RTP media when ReInvite transaction is answered without SDP. • Includes fixes for fetching MOS scores from VQT database file for voice quality analysis feature.	**23.6.15**
MAPS™ SIP I Enhancements: • Package built on VS2019. • Includes MAPS™ GUI and framework updates. • Includes script updates with all recent enhancements and fixes as in sync with our MAPS-SIP emulator product. • Includes latest python API updates. **Bug Fixes:** • Includes fixes for delay in RTP play to speaker feature for all codecs. • Includes VS2013 Redistributable dependencies for codec ACM installation and registration.	**23.1.6**
